

APPLICATION DATA SHEET

BLACKFAST 505 ACID PICKLE LIGHT

USE: Use as supplied or 50% solution in water.

APPLICATION: Blackfast 505 is used to remove rust and scales from cast iron. Unlike Blackfast 513 which will attack cast iron and leave it porous, Blackfast 505 being phosphoric acid based, will clean the surface but leave a non-porous base for blacking. Used as a 50% solution in water, pickling can be done at room temperature or, for a more speedy treatment, at 50-75°C. There is no foaming with Blackfast 505

TANK MATERIAL Tanks should be made of a suitable polypropylene.

PRODUCT SAFETY DATA SHEET: A safety data sheet is available.

Blackfast 505 is part of the Blackfast range of products for the treatment of iron, steel and aluminium at low temperatures.

Blackfast Chemicals continues to improve the quality and performance of its range of products and reserves the right to modify product formulations without prior notice.
